

ACCI Dual Dispenser Series

Processes • Silicone • Epoxy • Urethane • Urethane Foams • Polysulfides • Acrylic

400ml 2K
Dispenser

The ACCI Bench-Top Dispenser Series combines the simplicity and versatility of the dual barrel cartridge with bench mount support, pneumatic foot pedal, air logic, control panel and all the equipment needed to convert dual-cartridge to a bench top potting, encapsulating, bonding and dispensing system. Ideal for applications requiring that two components dispense simultaneously.

The ACCI two-part cartridge dispensing system is a cost-effective and completely portable method of injecting polymers and other components that need to be either combined or require precision metering by their application. ACCI equipment requires minimal maintenance and cleanup.

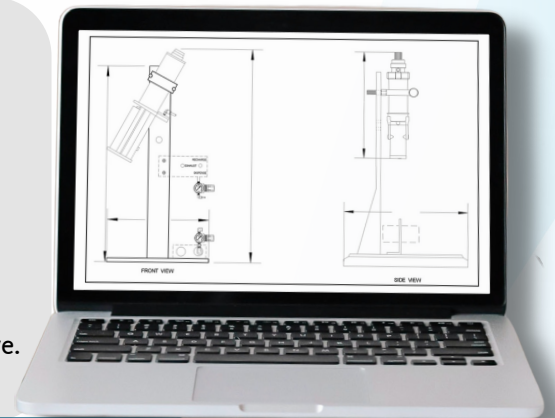

The ACCI dual cartridge dispenser provides the dispensing of 2-part materials from standard 50ml, 200ml, 400ml and 600ml 2-part, side-by-side cartridges. (Necessary Ratio TBD)

Change kits are available to accommodate various ratios (1:1, 2:1, 4:1, 10:1)

Models of use:

- "A" -Foot pedal actuated, operator shot control, dispensing from a mixing nozzle.
- "B" -Foot pedal actuated, operator shot control, dispensing from a pinch tube valve.
- "C" -Foot pedal actuated, timed shot control, dispensing from a pinch tube valve (external dispenser control box with digital display timer required).
- "D" -Foot pedal activated, volumetric shot control, dispensing from a pinch tube valve. (external dispenser control box and linear encoder for volumetric dispensing).

All models are bench-top dispensing units designed to dispense adhesive from desired cartridges

Application or size not listed above? We specialize in **CUSTOM DISPENSING!** Let our top engineers review your dispensing needs. Inquire at info@ashbycross.com or (978)-463-0202
