

Ashby Cross Company Inc.

The solution provider for your adhesive dispensing needs

Precision 1-Part Cartridge Dispensing

Hands Free Dispensing

The ACCI bench top dispenser combines the simplicity and versatility of the single barrel cartridge with bench mount support, pneumatic foot pedal, air logic, controls, and all the items needed to convert one-part-cartridge to a bench top potting, encapsulating, bonding, and dispensing system. The ACCI Cartridge dispensing systems is a cost-effective and completely portable method of injecting polymers and other components that need to be either combined or require precession metering by their application. ACCI equipment requires minimal maintenance and virtually no cleanup.

Applications:

- Bench Top Dispensing
- Production & Assembly processes
- Laboratory testing & inspection
- Prototypes & Experimentation
- For use with Epoxies, Urethanes, Acrylics, Silicones, and other adhesives.
- Converts One-Part-Cartridge systems into hands free bench-top dispensing systems

Features:

- Low cost, simple operation & low maintenance
- Reduces operator Fatigue and increase productivity
- Clean and reproduceable results
- Shot control adjustable and precise ratio control
- Less waste and greater accuracy
- Air powered Dispenser w/ foot pedal activation
- Variable flow rates & dispense speeds
- NO drip dispense
- Tool height adjustment
- Handles a variety of viscosities
- Accepts standard Luer lock needles

Options:

- Robot Integrations
- Material fed by pressure tank or high-pressure pump
- Measured shot size for repeatability
- Multiple cartridge sizes available
- Manual, Timed & Volumetric metering available
