

3800 Series Single-Acting Adhesive Dispensing System for Filled Adhesives and Sealants

The High Throughput System for Abrasive Adhesives:

- Up to 1500 cc/stroke
- Reduces number of cycles for less wear
- Hard-coated components reduce wear and maintenance
- Seals and packings are not subject to wear from abrasives
- Ratios from 100:100 to 100:6 (volume)
- In-line metering eliminates phasing

*Available with
Ashby Cross
IDS controls
or manual
operation.*

Applications:

- Potting/Encapsulating Electronics
- Motor Winding Encapsulating
- Inverter Encapsulating

For Use With:

- Epoxy
- Silicone
- Urethane
- Acrylic
